B 000	INITIAL COMMENTS An unannounced validation survey was conducted by federal surveyors from 8/27/18 to 8/29/18. The census at the time of the survey was 129 patients, and the sample was ten (10).	B 000		
B 108	DEVELOPMENT OF ASSESSMENT/DIAGNOSTIC DATA CFR(s): 482.61(a)(4) The social service records, including reports of interviews with patients, [REDACTED], and others, must provide an assessment of home plans and [REDACTED] attitudes, and community resource contacts as well as a social history. This Standard is not met as evidenced by: Based on record review, document review, and interview, the facility failed to provide psychosocial assessments that met professional social work standards. These assessments failed to include individualized patient-centered treatment recommendations that described anticipated social work roles in treatment and discharge planning for eight (8) of ten (10) active sample patients. (A1, A3, A4, A7, A8, A9, A10, and A11). The Psychosocial Assessment Form was preprinted and listed three generic treatment recommendations that could be selected by checkboxes. All of the eight (8) patient assessments listed had the same three treatment services. This failure results in a lack of individualized social work treatment services or lack of input to the treatment team. Findings include: A. Record Review 1. Review of the Psychosocial Assessments for	B 108

TITLE

(X6) DATE

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

In addition, interventions were often generic discipline functions that would be provided for every patient. This failure to document specific individualized treatment approaches on the MTP interferes with the assurance of consistency of approach to each patient's problem(s). (Refer to B122) Interview During an interview on 8/28/18 at 1:20 p.m., the Medical Director concurred with the deficient findings regarding the Psychiatric Evaluations. He stated that he was proposing the formation of a committee to address and make recommendations to improve systems that had been deficient or needed to be restructured.	B 144

Specifically, the interventions were pre-printed based on the chosen problem sheet (Depressed Mood, Symptoms of Psychosis, etc.) and were not designed to address individual patient needs. In addition, interventions were often generic nursing functions that would be provided for every patient. This failure to document specific individualized nursing treatment approaches on the MTP interferes with the assurance of consistency of nursing approach to each patient's problem(s).</p> <p>Interview</p> <p>During an interview on 8/29/18 at 10:15 A.M., the Chief Nursing Officer (CNO) acknowledged that many of the nursing interventions were generic, discipline job functions.</p>	B 148
